

as the main weapon of thought and of human activity as a means of identity formation, to closely link the learning process with life's demands and orientations of students.

In conclusion, it can be said that the new directions emerging within the framework of the humanistic concept exclude the previous provisions only at first glance. In fact, they absorb everything valuable that is created by pedagogical experience. As part of this experience, new provisions will be questioned and reinterpreted in the future.

MODERN PROFESSIONAL EDUCATION IN UNIVERSITIES OF A NON - LANGUAGE PROFILE AND METHODS OF REAL COMMUNICATION

N. M. Medvetskaya, Ph.D.,

Assoc. UO "VSU named after P.M. Masherova, Vitebsk

Key words: *vocational education, foreign language communication, universities.*

Annotation. *the article presents close cooperation with China on training in magistracy culture on the basis of the standard curriculum for the specialty "Physical culture and sports". The developed curriculum "Kinesiology as the basis of health-improving and adaptive physical culture on the basis of the standard curriculum for the specialty is offered.*

In the modern world, knowledge of foreign languages is also relevant in the professional activities of specialists of various levels and, no less important, it is the main way of real foreign language communication.

**Table -1 NAME OF DISCIPLINES AND ACTIVITIES (IN ACCORD-
ANCE WITH THE CUR RICULUM OF THE SPECIALTY)**

Pedagogy and psychology of higher education
Social and communication technologies in professional activity
Information technologies and mathematical statistics in physical culture and sports Module
Research work
Research Seminar
<i>Course work</i>
Medical and biological aspects of physical culture and sports
Elective disciplines: Physiological foundations of muscle activity/ Modern Pharmacology of Sports
Kinesiology as the basis of health-improving and adaptive physical culture
Comprehensive medical and pedagogical control in health-improving and adaptive physical culture
Elective courses: Marketing of sport and tourism/ the Special Olympics movement of persons with intellectual disabilities
<i>Business foreign language</i>
<i>Russian as a foreign language</i>

Material and methods. Educational establishment “Vitebsk State University named after P.M Masherova for many years has been preparing higher education for students of the 2nd stage in Russian according to the developed curricula. In the 2020-2021 academic years, there is close cooperation with China on training in magistracy in various specialties. The department of the theory of methods of physical culture and sports medicine of the university actively participated in this process: curricula and programs were translated into English.

The plan for assessing the acquired and acquired knowledge according to the program provides for the writing of term papers and master's theses by students. In particular, students prepared and passed course papers on the proposed topics.

Of interest is their scientific and methodological approach to disclosing the topic with the state of affairs in China, which allows their managers to evaluate their independence in the design of work and increase communicativeness in communicating with them in the future.

The curriculum "Kinesiology as the basis of health-improving and adaptive physical culture" has been developed, the training takes place with the development of lecture material posted in the SDO of the English-speaking magistracy. For a more in-depth and visual memorization of educational material, practical exercises on a schedule in the online mode in the form of conferences.

Educational process plan

KINESIOLOGY AS THE BASIS OF HEALTHY AND ADAPTIVE PHYSICAL CULTURE

1-08 80 04«Physical culture and sport»

(specialty code) (name of specialty)
